EXAMINER'S ACTION

Art Unit 1202

Claims 20-25 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 5158952. Although the conflicting claims are not identical, they are not patentably distinct from each other because of reasons given previously.

The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from claims in a first patent. *In re Vogel*, 164 USPQ 619 (CCPA 1970). A timely filed terminal disclaimer in compliance with 37 C.F.R. § 1.321(b) would overcome an actual or provisional rejection on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 C.F.R. § 1.78(d).

The Submitted Terminal Disclaimer is not proper because, the recording fee of \$110 was not submitted (nor is there an account<sup>u</sup> authorization).

In addition, there is no statement specifying the evidentiary documents have been reviewed and certifying that, to the best of the assignee's knowledge and belief, title in the assignee seeking to take action, See 37 CFR 3.73(b).

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).
